PROUDLY SERVING WEST COAST INDUSTRY SINCE 1995

What Spill Kit is the right one for you and your business?

Accidents happen – Are you prepared? It's your responsibility to clean it up. You should have the right products to divert and/or contain any liquid and prevent it from taking its natural course. West Coast Spill Supplies is available to ensure that you are prepared for all potential spills.

The dictionary defines a spill as: (of a liquid, loose particles, etc.) to run or escape from a container, especially by accident or in careless handling.

Choosing the appropriate Spill Kit can help save time, money and most importantly - The Environment.

Spill Management and Prevention:

Determine what you will NEED to clean up in the event of a spill.

- Would it be Oil or Gas from a car?
- Perhaps Antifreeze?
- Any other chemicals that you or your work place uses?
- How much liquid will you need to contain?
- What is your worse case scenario?
- Is there a storm drain that needs protecting?
- Are you near the Ocean? Lake? River? Creek?
- What are the potential risks?

Determine what YOU need to be safe.

- Do you have proper gloves on site?
- Is there a pair of goggles and booties close by?
- Do you have a proper way to dispose of contaminated items?
- Do you have the knowledge to clean up in the event of a spill?

West Coast Spill Supplies is your **One-Call** Supplier for a Complete Solution to meet all Environmental Regulations - **Call Today, Comply Tomorrow!**
