

OASIS TANK™

FOLDABLE FRAMED WATER TANK

Field-tested and proven to be a highly practical containment solution, the Oasis Tank is a must-have tool for rural fire departments.

With the Oasis Tank, while the pumper draws water from it, the water tender can make another trip for more water to refill it. This ensures a steady supply that allows crews to maintain fire action throughout the incident.

FRAME FEATURES

- 1" (2.5 cm) square aluminum tubing
- Solid welded accordion frame
- Lightweight aluminum that will not rust

LINER FEATURES

- 22 oz. (yellow) nylon or 28 oz. (orange) reinforced vinyl fabric
- 2" (5.1 cm) superior radio frequency welded seams
- 120" (25.4 cm) dump sleeve with grommets
- Grommets every 6" (15.2 cm) along top
- 2" (5.1 cm) webbing hand holds inside liner with 2" (5.1 cm) Fastex buckles allowing suction hose tie down and easy handling
- Replacement liners and parts are available for all sizes and brands of frame tanks and can be purchased separately

RELATED PRODUCTS

- Pumpkin Tank – open top water reservoir
- Low Profile Tank – water tank for structural firefighting

OASIS TANK

The frame of Oasis Tank is made of aluminum that will not rust.

The frame can be folded for easy transport.

The liner and parts can be purchased separately for replacement.

Two types of fabric (22 oz and 28 oz) are available.
