

MINI-BERM

COMPACT SECONDARY CONTAINMENT SOLUTION

Used for clean-up operations and spill containment, the Mini-Berm is easily placed under valves and fittings, trucks, drum and machinery. It's compact enough to fit into tight spaces, yet still built to the toughest specifications, using our rugged chemical-resistant fabrics.

DESIGN FEATURES

- Constructed of durable fabric that is resistant to chemicals, fuels, oils, and acids.
- Compact and lightweight for storage and easy transport.
- Easily cleaned and maintained.
- Designed to take standard size sorbent pads.
- Appropriate for containment of waste water, petroleum products, and various chemicals.

BERM OPTIONS

- **Drain fitting** – this fitting can be opened to let out accumulated rainwater, or connected to a hose to pump out spilled product
- **RainDrain** – removed hydrocarbons and additives from capture water through gravity drainage
- **Berm Handle** – handles can be attached on the sides or bottom to make handling liquid easier

FABRIC OPTIONS

- **CHEM-SHIELD** – Chemical-resistant fabric
- **ARCTIC-SHIELD** – Chemical resistant fabric for temperatures to -50 degrees Fahrenheit (Arctic-Shield fabric is not suitable for acids)
