

RIDE-SIDE BERM™

SECONDARY CONTAINMENT FOR VEHICLES

Specifically designed for vehicles, the Ride-Side Berm has collapsible walls that allow vehicles to enter and exit without manual assistance. Ideal for capturing liquid under vehicle, remote site refuelling or temporary secondary containment around tanker trucks, the rugged design of the Ride-Side Berm will allow it to be used in the toughest environments.

DESIGN FEATURES

- L-Rod side walls allow operators to quickly setup the berm and provide rigid support for the non-collapsible walls.
- The Ride-Side Berm's fully collapsible design allows the berm to be stored and setup quickly without tools.
- Eyelet patches along all sides of the berm allow for use with stakes for long term use in rugged terrain.
- Drains in all four corners allow the berm to be gravity drained quickly through a water filter system.
- Constructed of the rugged, abrasion resistant Chem-Shield 30 oz. fabric, the standard Ride-Side Berm is suitable for containment of a variety of chemicals.

BERM OPTIONS

- **Drain fitting** – this fitting can be opened to let out accumulated rainwater, or connected to a hose to pump out spilled product
- **Mini-ramps** – allow vehicles to exit the berm while liquid is inside the berm
- **Track Belting** – protects the Ride-Side Berm from heavy tracked vehicles and extends the berms life
- **RainDrain™** – removed hydrocarbons and additives from capture water through gravity drainage
- **High Wind Stake** – anchors the berm to the ground

FABRIC OPTIONS

- **CHEM-SHIELD** – Chemical-resistant fabric
- **ARCTIC-SHIELD** – Chemical resistant fabric for temperatures to -50 degrees Fahrenheit / -45.6 degrees Celcius (Arctic-Shield fabric is not suitable for acids)

RIDE-SIDE BERM

SECONDARY CONTAINMENT FOR VEHICLES

QUICK DEPLOYMENT

Collapsible hands-free flotation walls allow even heavy tracked vehicles to repeatedly enter and exit the berm without manual setup. The unique flotation walls will become erect as liquid fills the berm.

Mini-ramps allow vehicles to exit the berm with 1" of liquid without spilling.

INSTA-BERM SPECIFICATIONS						
MODEL	CAPACITY		INSIDE DIMENSIONS (L x W x H)		SHIPPING WEIGHT	
	USG	LITERS	FT. / IN.	METERS	LBS.	KG.
